

DHDC-2430

Chlorinated rubber top coat

This paint is a chlorinated rubber top coat made of chlorinated rubber resin and excellent weather-resistant pigments. The appearance of the film is beautiful, and it has a good gloss and color retention ability and excellent water resistance, weather resistance, heat resistance, salt water resistance, and oil resistance, and good workability. Because it is easy to work with and dries fast, it shortens the time interval of re-coating, so it is widely used in painting processes requiring fast-drying.

Usage

Top coat for steel structures

Specification

Paint type	Modified chlorinated rubber / Top coat			
Drying time	Category	5°C	20°C	30°C
	Set-to-touch	1 hour	30 minutes	20 minutes
	Dry-hard	6 hours	4 hours	3 hours
	Over-coat (Min.)	8 hours	5 hours	4 hours
Thinner	DR-90	Dilution ratio	▷ Brush, roller coating: less than 15%	
Specific gravity	Approx. 1.2(Based on white color)		▷ Airless, spray coating: less than 10%	
Theoretical Coverage	10 m ² /ℓ (1 time - 35μm)	Solid volume ratio	Approx. 35±1%	
Color	White, other colors	Thickness of dried film	35μm	
Gloss	Glossy	Flash point	At least 7°C	
		Shelf life	12 months (Dry, cool, and dark place with good ventilation)	

How to Use

Surface treatment	<ol style="list-style-type: none">1. Completely remove oil, moisture, sand, dust, and other foreign matter from the surface to be coated.2. Sufficiently dry the surface to be coated before coating.3. After primer coating, clean up the welded areas (blackened and rusted areas) with a disc sander. Then, touch up with this paint and continue coating.
Coating Method	<ol style="list-style-type: none">1. Although coating can be done by either brush, roller, air or airless spraying, airless spray coating is best for obtaining a sufficient coating thickness.2. Airless spray coating :<ul style="list-style-type: none">- Tip diameter : 0.015"~0.019"- Injection pressure : More than 2500 P.S.I (176kg/cm²)- Store the coating equipment after cleaning with an exclusive thinner immediately after use.
Preceding & Follow-up Coating	<ol style="list-style-type: none">1. Preceding coating : Wash primer, Chlorinated rubber system paint
Remarks	<ol style="list-style-type: none">1. Follow-up coating with a brush or roller on top of chlorinated rubber paint may result in bleeding as the internal pigment melts. To prevent this, airless spray coating is recommended.2. This is a thermoplastic substance that can be softened and decomposed at high temperature (70°C).
