

DR-5322

HIGHWAY THINNER(FOR ROAD MARKING)

This thinner is made mainly of aromatic hydrocarbon. It is a quick-drying thinner used for KSM-6080 1 kind and DHW-8800 paint. If another paint is used instead of DR-5322 as a road paint thinner, be sure to use the recommended thinner because it may cause a delay in drying or bleeding (black asphalt exudes) from the substrate.

Usage

Road paint thinner

Specification

Paint type	Aromatic hydrocarbon
Specific gravity	Approx. 0.8
Appearance	Transparent liquid
Flash point	At least 5°C
Storage Condition	Store indoors with good ventilation
Shelf life	12 months from the manufacturing date

Product Properties (Physical Property Data)

Highway thinner	The diluting ability with road surface marking paint is excellent.
-----------------	--

How to Use

How to Use	1. Add a specific amount to the road surface marking paint depending on the type of work.
Remarks	1. Wear protective gear and ventilate sufficiently to prevent inhalation by scattering. 2. The product is inflammable and thus vulnerable to fire. Never keep or use the product near fire. Make sure to avoid sparks by impact, dropping, or friction upon handling. 3. Do not mix with other thinners. 4. Fully understand the MSDS before handling the product.
