

DR-306

ALKYD ENAMEL THINNER

This thinner is based on aliphatic aromatic hydrocarbons and is designed to provide the best properties of alkyd-based paints. (200°C heat-resistant paint, 300°C alkyd type, etc.).

Specification

Paint type	Aliphatic and aromatic hydrocarbons.	
Specific gravity	0.8	
Distillation curve	Category	°C
	Initial Boiling Point	110~115
	Temperature at 90% Outflow	160~195
	Final Boiling Point	Less than 215

How to Use

Storage	Store at room temperature (5°C-30°C), away from direct sunlight to prevent freezing.
Warnings and cautions	Please read the warnings and cautions before using this product.☐
