

ALL IN ONE WATER-BASED WATERPROOFING FOR ROOFTOP

A simple, user-friendly ALL IN ONE WATER-BASED WATERPROOFING FOR ROOFTOP that streamlines traditionally complex waterproofing into a single, easy step.

This one-component system replaces the traditional three-step rooftop waterproofing process, delivering enhanced efficiency and consistently high-quality results. Suitable for rooftop applications and offered in gray, green, and additional colors, it can be applied directly from the container for maximum convenience. Combining practicality with high performance, it enables anyone to achieve professional-grade waterproofing results effortlessly.

Applications DIY rooftop waterproofing for both newly built and aging concrete structures.

Excellent Waterproofing!

Its year-round flexibility and strong adhesion provide exceptional cracking resistance.

Easy Workability!

By integrating primer, intermediate coat, and topcoat into one step, it delivers outstanding workability and superior application efficiency.

Excellent Weather Resistance!

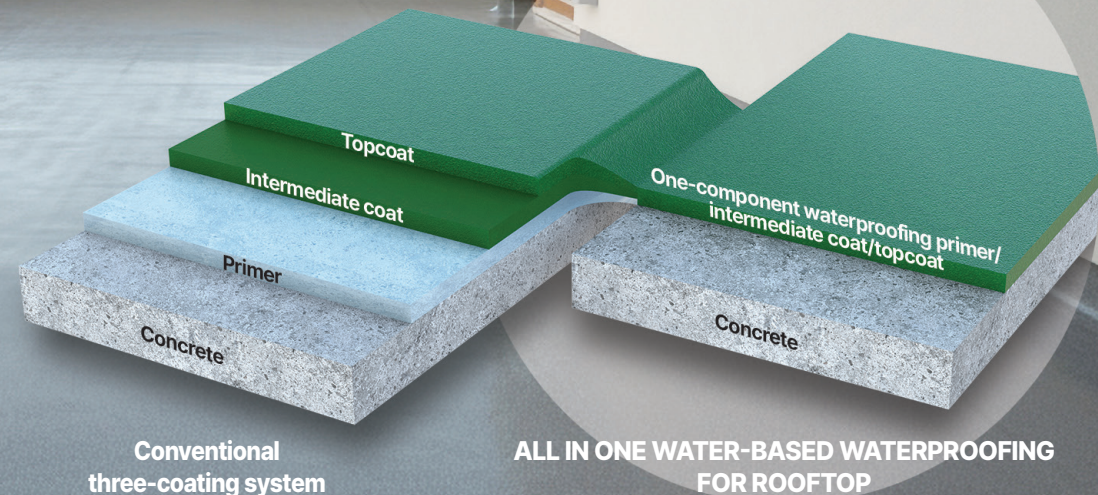

Formulated with 100% acrylic resin, it provides excellent long-term weather resistance and superior anti-yellowing properties.

With its 100% acrylic, water-based formulation, the coating maintains stable flexibility and adhesion even under fluctuating climate conditions. Its all-in-one structure consolidates three-steps into one, enabling users of any skill level to achieve professional-quality results with ease.

Category	Description
Paint type	Special elastic emulsion / Water-based exterior
Thinner	For primer use, dilute 1:1 with water (by volume). For intermediate coat/topcoat use, apply undiluted (less than 5% tap water if necessary).
Coating Method	Brush, roller, spray coating
Specific gravity / Solid volume ratio	Approx. 1.16 / Approx. 46% (based on gray color)
Theoretical Coverage	0.4m ² /kg
Thickness of dried film	1mm (4 coats)
Re-coating interval	20°C, sufficient ventilation for a minimum of 3 hours
Color	Green, Gray
Storage and preservation	12 months (Dry, cool, and dark place with good ventilation, room temperature 5°C~30°C, humidity less than 80%)

**Complex waterproofing, now in a single step!
One-component, water-based
ALL IN ONE WATER-BASED
WATERPROOFING FOR ROOFTOP!**

Key Benefits of ALL IN ONE WATER-BASED WATERPROOFING FOR ROOFTOP!

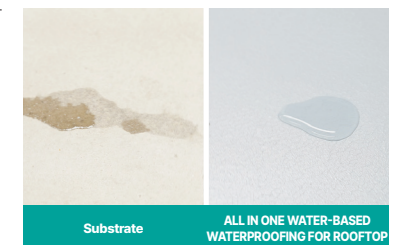

✔ **Integrated all-in-one water-based waterproofing for rooftop solution!**

By unifying the functions of primer, intermediate coat, and topcoat into a single formulation, it simplifies product selection while significantly enhancing application efficiency and finish quality.

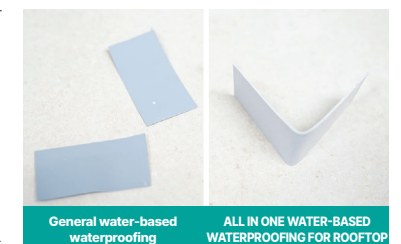

✔ **Professional-grade waterproofing performance!**

Engineered with a 100% acrylic-emulsion formulation, it delivers exceptional durability and flexibility, ensuring long-lasting waterproofing performance that protects structures against time and harsh environmental conditions.

✔ **A one-component, water-based waterproofing coating that can be applied even at low temperatures.**

Easily applied with only a roller or brush, this ultra-convenient water-based waterproofing maintains excellent film flexibility even below freezing - one of its most distinctive performance advantages.

Flexibility test after freezing at -15°C ▶
